

Vets Helping Heroes

Dedicated to providing assistance dogs to veterans injured in the current conflicts
It's our turn to fight for them

Dear Lou,

Where do we begin. Words are not enough to thank you for what you've done, not just for Vets Helping Heroes but for the many thousands of men and women injured while preserving this countries safety and way of life. What an incredible job you and everyone involved have done on the documentary film you have created and provided to us. We continue to marvel at the time and effort that must have been sacrificed to create it. Everyone who sees it agrees it affected them in a way they didn't expect. A good way. Please extend our sincerest gratitude to all who participated in the project. Especially your son who I'm sure brings you great pride.

You're thoughtfulness and generosity will never be forgotten and we will continue to try to find ways to repay you but fear we never will. We hope the enclosed plaques are a small start.
